

Dear School Leader:

This report provides you with information about your school's performance in English Language Arts, Mathematics, and, where applicable, Science on the Pennsylvania System of School Assessment (PSSA).

The report is designed to give you:

- An overview of how your school's performance compares to previous years;
- An overview of how your school's performance compares to the performance of students in your district and across the Commonwealth;
- In-depth results by grade, subject, and student group;
- Data on your school's achievement by reporting category; and
- Tools and resources for finding more information to help teachers better understand the assessment and instructional priorities.

I encourage you to use this report and supporting materials on the PDE's website to help teachers understand the standards, set instructional priorities, and address student needs.

Sincerely,

Pedro A. Rivera
Secretary of Education

District: HEMPFIELD AREA SD
School: WEST HEMPFIELD EL SC
AUN: 107653802-000004399
Test Date: PSSA Spring 2016

Percentage of Students Proficient and Advanced

	School	District	State
English Language Arts	70.1	75.8	60.4
Mathematics	63.4	58.3	42.5
Science	84.8	80.1	67.0

WEST HEMPFIELD EL SC

PSSA Facts

PSSA Items

Common items are administered to all eligible students in the grade regardless of the test form that they were assigned. Only the common items are used in determining students' scores and their corresponding performance levels. This ensures that all students are evaluated using the same sets of items. Only common items are used for determination of performance levels.

Field-Test items vary between forms. These items are included only as a means for gathering statistical information about an item that might be used in a future assessment. The items are not included in the results for students, schools, or the district.

PSSA Score

The PSSA score is a scale score computed from the number of points the student receives on the test (i.e., raw score). For every possible raw score on a test form, there is a corresponding scale score. Most state testing programs use scale scores for reporting purposes. The items on the PSSA tests change year to year, but they continue to measure the same content standards. To make valid comparisons of test results across years, scale scores are used because they reflect and take into account minor differences in test form difficulty from one year to the next. A given scale score will have the same interpretation regardless of the length or difficulty of the test. For example, a scale score of 1300 will always imply the same level of student performance and will continue to fall in the same performance level. The student's PSSA score is used to place the student in the appropriate performance level.

PSSA Performance Levels

Below Basic: Inadequate academic performance, and work at this level demonstrates a minimal command of and ability to apply the knowledge, skills, and practices represented in the Pennsylvania standards. Consistent performance at this level indicates extensive additional academic support may be needed for engaging successfully in further studies in this content area.

Basic: Marginal academic performance, and work at this level demonstrates a partial command of and ability to apply the knowledge, skills, and practices represented in the Pennsylvania standards. Consistent performance at this level indicates additional academic support may be needed for engaging successfully in further studies in this content area.

Proficient: Satisfactory academic performance, and work at this level demonstrates an adequate command of and ability to apply the knowledge, skills, and practices represented in the Pennsylvania standards. Consistent performance at this level indicates academic preparation for engaging successfully in further studies in this content area.

Advanced: Superior academic performance, and work at this level demonstrates a thorough command of and ability to apply the knowledge, skills, and practices represented in the Pennsylvania standards. Consistent performance at this level indicates advanced academic preparation for engaging successfully in further studies in this content area.

PSSA Reporting Categories

Reporting Categories are designed to clarify the Pennsylvania Core Standards. Each reporting category consists of several assessment anchors and eligible content, which provide details of skills and concepts that are assessed on the PSSA. The charts that follow provide school, district, and state averages for each reporting category assessed for specific grades and subjects.

WEST HEMPFIELD EL SC

Performance Level Distribution by Subject

English Language Arts Performance Level Results

In 2016, 70.1 % of the students at WEST HEMPFIELD EL SC met or exceeded proficiency in English Language Arts. Comparatively, 60.4 % of the students in Pennsylvania met or exceeded proficiency in English Language Arts. Use the 2015 data provided to determine your district's two-year progress in ELA and Mathematics. For Science, use the 2014 and 2015 data provided to determine your district's three-year progress. These numbers indicate only the students who are in their full academic year.

* The sum of the percentages may not equal 100 due to rounding.

ACHIEVING THE GOAL: Proficiency for All Students

Pennsylvania's Standards Aligned System (SAS)

Great schools and great school systems have six features in common:

- **Clear standards** describing what students should know and be able to do at each grade level.
- **A fair and accurate way to assess** where students are in regard to what they know and are able to do at each stage of the learning process.
- **Curriculum frameworks** that identify the big picture of what students should know and be able to do over time in each content area, as well as the concepts and competencies that break that information into grade-level benchmarks. Included in the frameworks are essential questions students will be able to answer at each grade level or course, vocabulary specific to the content, and exemplars demonstrating what proficient student work looks like.
- **Instruction** that explicitly identifies and provides examples of best practices in teaching.
- **Classroom materials and other instructional resources** that are aligned to the expected outcomes for students in each content area at each grade level or course.
- **Proven interventions** to help any student who struggles at any stage of the learning process.

The Pennsylvania Department of Education created the system that aligns these high impact elements to help students, parents, teachers, and administrators inspire all Pennsylvania's schools to become great schools.

www.pdesas.org

Data Tools in a Standards Aligned System

School Performance Profile (SPP)

SPP provides a school level academic score for public schools, including charter and cyber charter schools, and full-time comprehensive career and technical centers. SPP can be used as an analysis tool to inform goal setting, planning, and allocating resources to improve student achievement. It is a source of information for federal designation of Title I schools as a Reward, Focus, Priority or Undesignated school for Title I and Non-Title I schools.

<http://paschoolperformance.org>

Classroom Diagnostic Tools (CDT)

An on-line computer adaptive diagnostic tool aligned to the Pennsylvania Core Standards. Although not a predictor for PSSA performance, CDTs provide a snapshot on students' strengths and areas of need. It provides real-time results that link students' skills with Materials and Resources in SAS.

<https://pa.drccedirect.com>

PSSA Data Interaction by eMetric

Designed to provide quick, easy, and secure access to student performance results on the Pennsylvania System of School Assessment (PSSA). Reports can be created in tables, graphs, or external files, at the summary or individual student level, by selecting content, statistics, aggregation levels, disaggregated groups or subgroups, and/or score variables.

<http://pa.emetric.net>

PA Value-Added Assessment System (PVAAS)

A statistical model that analyzes longitudinal growth data, in conjunction with achievement data, to make sure students are on the path to proficiency and beyond. Measuring student learning helps educators make data-informed instructional decisions that address the academic needs of a group of students, as well as individual students. PVAAS provides projections of each individual student's likelihood to achieve a selected proficiency level.
